

# Colors

We recommend having 2 to 3 accent colors throughout your home and keeping the rest neutral. Kids rooms are the exception to this, although I still love muted colors in a kid's room.

On walls, we typically paint a light gray, greige or a warm white. Agreeable Gray is one of our most popular colors and typically pairs well with other elements in your home! Some of our other no fail colors are Alabaster, Shoji White, Alpaca, Repose Gray and Accessible Beige. These neutral colors work well throughout a home that is being prepped to sell.

If you are wanting an accent color on walls or in décor, we recommend Naval, Tricorn Black (for doors or

mantels), Urbane Bronze, Black Fox, Peppercorn and Iron Ore. These colors also work well for doors and mantels.

For example, Naval is a popular color that works well in many homes and styles. We use it for our design and staging clients. Oftentimes, if we incorporate navy, we will utilize the same color or similar blues throughout the home with artwork, pillows and décor. It gives a cohesive feel to the entire space and creates a consistent story.
